Questions Parents Should Ask Their Children About Technology
Sameer Hinduja, Ph.D. and Justin W. Patchin, Ph.D.

It is important to talk with youth about what they are doing and seeing online. Most of the time, they are using technologies safely and responsibly, but sometimes they run into trouble. As a parent, you want to establish an open line of communication so that they are comfortable turning to you in times of crisis, whether perceived or actual, and whether online or off.

Below we list several questions that you can use to get the proverbial ball rolling. Be strategic in how you approach your children with these queries: don’t badger them with questions first thing in the morning or when they are stressed out about something at school. Find a time when they are open to your interest in these topics. Maybe it is during a longer car ride to an activity that they are really looking forward to. Or bring them up while you are eating ice cream on a hot summer afternoon. If you catch them at the right time, they will prove to be a treasure trove of information that can help you better understand what they are doing online.
